

GlideLift XR

counterweight access platform

Designed for optimum clearance

The GlideLift XR height adjustable access platform has been designed to access areas where optimum clearance is required. The GlideLift XR's cantilevered design allows it to be positioned close to your point of access allowing optimal outreach. With a 900mm long platform, the GlideLift XR offers 1.50 metres of working outreach at a maximum platform height of 2.1 metres. The GlideLift XR offers users complete fall protection and ensures compliance with the Work At Height Regulations.
